

Sanis UltraClean

Why Restroom Cleaning?

- Frequent cleanings help prevent cross-contamination and provide a more sanitary restroom environment.
- Providing a cleaner restroom reduces costs associated with employee illness and lost worker productivity.
- 95% of users would avoid an establishment in the future if they found the restroom to be dirty.*

Why Sanis UltraClean Service?

- Trained Cintas technicians deep clean the restroom, allowing our customers to focus on their business.
- Our documented cleaning process is designed to:
 - Deep clean the restroom to extract the soils and build-up, leaving our customers the clean restroom they desire.
 - Focus on the details that count to both the user and our customers (high contact points, mirrors, graffiti on surfaces and more).
- High-pressure washing and vacuum technology remove build-up that brushes and mops can't reach, giving our customers a higher level of clean.
- Hospital-grade disinfectants kill and remove dangerous pathogens like MRSA.
- The deep cleaning power makes daily maintenance easier and more efficient for our customers.
- No upfront investment in various cleaning machines (auto scrubber, dry/wet vacuum, pressure washers, grout cleaning machines, etc.) saves our customers money.
- Service flexibility is determined by our customers' needs.
- Flexible program to meet the needs of your business.
- Convenience of a single-source supplier that offers a comprehensive "Clean Restroom" Program.
- Increased employee morale by making the job of maintaining a clean restroom easier and more efficient.
